

Certificate

This is to certify that

has accepted Mission PenPals challenge to completely

Break-up with Single-Use Plastic Pens

and has pledged to adopt climate-positive practices like REDUCING dependency on other plastic pens, REUSING pens with Re IIs, adopting SUSTAINABLE alternatives like fountain pens / bamboo pens / paper pens to contribute to a healthier planet.

Together, we are fighting climate change by creating a
"Litter - Free, Literate World" - One Pen at a Time.

Prakshal Mehta / Wricha Johari

Founder Director, WAY Everything Connects Foundation

OVER 60 BILLION PLASTIC PENS

are used and thrown away each year, with the majority never being recycled.

With Mission PenPals not a single used pen goes to landfills, water bodies or incinerators. They are reused, resold, upcycled and recycled

to support better education, protecting environment and saving resources. PenPals is on a Mission to create a "Litter-Free, Literate World", One Pen At a Time. We encourage people and organizations to join this multi-dimensional and multi-stakeholder

challenge of "Breaking up with Single-Use Plastic Pens" through Education, Partnerships, Campaigns, Solutions, and Advocacy.

By joining this mission, individuals and organizations contribute towards creating a cleaner and more literate world.
